

The Mathematics Department at Durrington High School

Durrington High School has an outstanding Mathematics department staffed by an innovative and experienced team. We have a shared ethos within the department that has enabled us to achieve outstanding examination results for the past 7 years. We are continually striving to improve, and endeavour to ensure that every student is provided with an outstanding learning environment that allows them to achieve their best.

2017 exam results continued to be impressive with 63% of students achieving a 5+ with 25% achieving a grade 7 – 9, both were considerably above the national average. The highest achieving students also took Further Mathematics at GCSE, with 43% achieving A/A*.

We are a large department consisting of 13 full time teachers. We also have two HLTAs who work within the department at all times. Every class room has an interactive smartboard and the department has its own dedicated computer suite. With year groups of 330 it makes outcomes even more special.

We are looking for an enthusiastic and committed teacher who sets themselves and our students' high expectations. The successful candidate will be an excellent teacher who is dedicated to delivering high quality lessons and is prepared to commit themselves to the role completely. This is not a department where you can rest on your laurels; we have extremely high expectations and expect every teacher to make a contribution to our on-going success. We are keen to retain our staff and there will be opportunities for those who can make a difference. For example we have three of the team currently studying for their Masters; with the school funding half of it. We also have five staff who are in their early years of teaching already in a leadership role.

In return you will find us a very supportive and warm team, with a range of experiences and teaching styles but also receptive to new ideas. You will be fully supported by a mentor who will provide you with the necessary support on a day to day basis. We also have a fully interactive Scheme of Work that every member of staff follows, this includes numerous resources and structured homework tasks.

If you are an enthusiastic, hardworking, conscientious and energetic teacher who not only values young people but can motivate and inspire them across the age and ability range then we would like to hear from you.
