

On Tuesday 10 October 2017 we held the first of our Key Stage 4 parents' support evenings where we had presentations from the Directors of the core subjects (maths, English and science) as well as providing information to parents and carers on how you can support the students and keep them on track throughout the next two years.

The evening included presentations on/from:

- Important changes in the GCSE grading system.
- The three core subjects (English, maths and science).
- Strategies for effective learning and suggestions on how to support your child with their studies.

We are aware that a lot of information was given out to the parents and carers on the evening, and a number of year 10 parents and carers were unable to attend due to other commitments so we thought it would be useful to make the resources available to you.

Please click on the links to download the resources that were used on the night and if you have a specific question about any of the presentations from the night, please contact your child's teacher in the first instance or for learning strategies, Ms Haynes.
