

Year 11 Study Skills Support Evening – Monday 12 March 2018

Dear Parent / Carer

As our year 11 students approach their final exams in the summer, it is vital that they are fully equipped with all the necessary knowledge and the most effective study strategies. A large part of their success will be down to how effectively they manage their time, and implement a successful revision programme, in the run up to the summer exams.

In order to support parent / carers in helping their children prepare for their examinations we are offering a second opportunity to access the latest research-evidence on effective study.

The evening will run on Monday 12 March from 6pm – 7pm. Both parents and students are welcome to attend. At this event the teaching and learning leadership team will share the learning scientists’ six strategies for effective study. Please note that this will be a direct replication of the evening run earlier in the year, so please only attend if you wish to have a refresher session on these strategies or were unable to attend originally.

Yours sincerely

Mr C Runeckles
Senior Leader – Teaching and Learning
