

Team Maths Challenge Success

In March, a team of students travelled to Lancing College to participate in the UKMT Team Maths Challenge. The team consisted of four students in year 8 and 9: Aarash Jazayeri, Scott Haysom, Evie Thoms and Tamzin Bushnell.

The competition was challenging, with many private schools taking part. The team from Durrington achieved a special mention in the first round for gaining the most points in the one hour session, and went on to finish in the top 10.

This is the highest we have ever ranked in the Team Maths Challenge. The students worked incredibly hard to achieve this result and were an absolute credit to the school. Well done!
