Dear Parent/Carer

E-Safety – Supporting you in keeping your son/daughter safe online

Social media is an ever increasing part of many young people's lives (and perhaps ours too). It can however be hard to negotiate for many young people and cause problems that they are unsure how to resolve.

We are also aware that the trends in social media use are very fast changing, especially for younger users and parents often ask us for advice about how to approach the issues that arise.

We would like to invite you to an online safety evening at Durrington High School.

We will discuss:

- The key issues that are happening now amongst 11-13 year olds.
- How (in our experience) they are best prevented.
- Some of the technical details of privacy settings.

There will not only be a chance to speak to staff about any concern you may have but there will also be practical advice about how to set up and monitor filters/controls and safety features within APPs your son/daughter may already be using.

The evening will run from 5.30pm to 6.30pm on Monday 12th November.

We have very limited places available so please don't hesitate in replying by email to jnanson@durring.com with your name and son/daughter's name.

Yours sincerely

Mr S Down
Assistant Headteacher
