

Welcome to Music

What will you learn about in Music?

Students within KS3 Music lessons explore a variety of genres and musical styles. Students are able to experience performing and composing using the most current equipment and software. From Year 7 through to Year 9 students learn about a range of musical styles while being creative individually and as different sized ensembles all the way up to large whole class ensembles. Students are encouraged to work on and include the prior knowledge, opinions and skills of music. Year 7 students explore rhythm, singing, reading music and the history of music among others.

Why is it so important to study Music?

“There is music in the air, music all around us; the world is full of it, and you simply take as much as you require.” – Edward Elgar. Studying music is able to give so much more than just knowledge. Whether you are listening to, performing or creating, music allows you to express and feel different emotions. It enables you to develop key team working skills that you can use in many different roles in life. It is a chance to express yourself while developing the focus, perseverance and resilience needed for everyday life.

“I like music because it is fun and creative. You get to come up with your own music. You get to learn that music is more complicated than you think and I love that it challenges me.”

Luci, year 9
