

Welcome to

Science

What will you learn about in Science?

Students will learn about the fundamental ideas in science and their applications in real life. Science lessons will be broadly divided into biology, chemistry and physics and will cover a range of topics within each science. You will revisit these topics throughout the years allowing you to build a greater depth of knowledge and scientific understanding. Our science teachers are committed to imparting their knowledge, passion and enthusiasm for science, with many staff having studied a range of degrees further enhancing the experience. Students will learn how to think scientifically as practical investigations and engaging demonstrations are used regularly to enhance understanding and bring science to life!

Why is it so important to study Science?

It is important to study science as it is vital to all aspects of life. The knowledge and skills you gain from science will help you understand the world around you, ranging from the microscopic world to understanding the forces between planets. Science will also help you understand and make informed decisions on what you see and hear in the news and the media. STEM related jobs are also in abundance and growing where 72% of all jobs require STEM related skills.

GCSE Results 2020

Name	Entries	9 - 4 %	9 - 5 %	9 - 7 %
Science	210	77%	60%	28%
Biology	93	96%	83%	55%
Chemistry	91	93%	88%	63%
Physics	91	97%	85%	58%
