

# How to use Google Classroom

- 1) All students are allocated a Google account
- 2) Your child's Google login details are the same as their school account.
- 3) Google works best in Google Chrome and not Internet Explorer or Edge.
- 4) All the classes have been set up for your child and they have been using it in their Computing lessons.
- 6) There are some good online tutorials:

**Your child needs to follow their school timetable. When it is time for a lesson, they click on their Google Classroom where the work will be ready for them to complete. Staff will be 'live' on the Classroom to give support and feedback.**

*Transforming lives, learning and the communities we serve*

# The teacher will take a register at the start of each lesson and introduce the work set.

## For example:

“Hello class. This is Mrs Allison and our lesson is going to begin. Please complete the Series Circuit calculation sheet under the “classwork” tab and let me know on the stream if you have any questions or problems.”

They will also ask your child to confirm they are present for the lesson by taking a register.
