

DURRINGTON HIGH SCHOOL
ASTHMA INFORMATION FORM - Individual protocol for Mild Asthma

Please complete the questions below so that the school has the necessary information about your child's asthma. **Please return this form without delay.**

STUDENT NAME:

TUTOR GROUP:

- We advise that all pupils who need an inhaler carry it with them at all times.
- They should also have a spare inhaler in school in case their inhaler runs out, gets lost or left at home.
- Inhalers must be clearly labelled with your child's name and must be replaced before they reach their expiry date.

1. Does your child need an inhaler in school? **YES / NO**

2. Please provide information on your child's current treatment. (Include the name of medication, type of inhaler, the dose and how many puffs and if they have a spacer).

.....
.....

3. Any known triggers for your child's asthma?

.....

4. The school has a standard blue inhaler (100 micrograms salbutamol sulfate). In the event that your child requires an inhaler and is unable to access their own personal one or their spare one, do you consent for them to have doses administered, via a spacer if required, from the school inhaler? **YES, I consent / NO, I do not consent**

I understand that my child needs to carry their own inhaler whilst at school and on school visits. I agree to ensure that a spare in-date inhaler (and a spacer if prescribed) is provided to the school.

DURRINGTON HIGH SCHOOL
ASTHMA INFORMATION FORM - Individual protocol for Mild Asthma

Please tick the appropriate statements:

- My child will carry their own inhaler.
- My child requires a spacer
- My child does **not** require a spacer
- I will provide a spare inhaler/ spacer for the school to hold.
- Does your child need a blue inhaler before doing exercise/PE? If so, how many puffs?

Do you give consent for the following treatment to be given to your child, as recognised by Asthma Specialists, in an emergency?

- Give 6 puffs of the blue inhaler via a spacer
- Reassess after 5 minutes
- If the child still feels wheezy or appears to be breathless they should have a further 4 puffs of the blue inhaler.
- Reassess after 5 minutes
- If their symptoms are not relieved with 10 puffs of blue inhaler than this should be viewed as a serious attack:
- CALL AN AMBULANCE and CALL PARENT

YES, I consent / NO, I do not consent

Please remember to inform the school if there are any changes in your child's treatment or condition.

Parental Update (only to be completed if your child no longer has asthma)

My child no longer has asthma and therefore no longer requires an inhaler in school or on school visits.
